Profile

Motivated Front-end Developer in transition from a 4-year career in Embedded Systems. Currently strengthening my skills in **HTML, CSS, and JavaScript**, with a clear roadmap to master **React.js** in the next few months.

Strong background in **team collaboration, problem-solving, and product development** from prior engineering experience.

Passionate about building user-friendly and efficient web applications, with a mindset of continuous learning and growth.

Skills

Front-end Development (in progress)

- **HTML5** (solid)
- **CSS3** (Box Model, layouts, responsive design basics)
- **JavaScript** (intermediate – DOM, ES6+, functions, arrays, objects)
- **Git & GitHub** (basic, improving)
- **React.js** (planned learning – mid 2026)

Engineering Background

- 4+ years in Embedded Systems development
- Strong problem-solving and debugging skills
- Collaboration with cross-functional teams
- Experience in product lifecycle and agile workflows

Soft Skills

- Quick learner and adaptable
- Effective team player
- Strong communication and responsibility

Experience

Embedded Systems Engineer
[Rayan Khodro Andish] | (2021 – present)

- Developed and maintained embedded software for automotive/electronic systems.
- Collaborated with multi-disciplinary teams to deliver reliable solutions.
- Contributed to system design, debugging, and optimization.

Projects (Front-end training)

(Planned for 2026)

- **Portfolio Website** – Personal showcase with HTML, CSS, and JavaScript.
- **React Test App** – Hands-on project to practice component-based development and state management.

Education & Training

- Self-learning Front-end Development (2024–2026, ongoing)
- Mechanical Engineering – IAU south Tehran branch faculty of engineering

---

Additional Information

- Military Service: Not completed

Languages

- English — Intermediate

Future Goals

To become a skilled **Front-end Developer** specializing in **React.js**, while leveraging my engineering background to bring structured problem-solving and team-oriented mindset into web development projects.
